Comparable to the likes of ayahuasca, psilocybin mushrooms, and mescaline, a new mind-altering drug is hitting the US psychedelic scene – toad venom. The drug comes from a rare species of toad native to the Sonoran Desert, Bufo Alvarius, which produces a venom known as 5-MeO-DMT: an extremely potent natural psychedelic. 5-MeO-DMT is ...

Psychedelic Toad Venom Is the New Trendy Hallucinogenic ...

It was also found in the venom of the Colorado River Toad (Bufo alvarius/Incilius alvarius or Sonoran Desert Toad), sometimes at levels of up to 15% by volume. [42] From the early 1970s, 5-MeO-DMT could be legally ordered in the US and other countries via mail order from the Church of the Tree of Life [43] and the Church of the Toad of Light. [44]

is: Ecstasy (MDMA) production has led to the deforestation of entire regions of southern Asia for decades; peyote has become endangered in recent years; and the Colorado River Toad — Bufo alvarius, which carries a psychoactive venom containing 5-MeO-DMT — now has ...

Psychedelic Businesses Can Be Leaders in Sustainability

De reuzenpad heeft verschillende Nederlandse namen, zoals agapad, Zuid-Amerikaanse reuzenpad, (suiker)rietpad en zeepad. Op Aruba, waar de soort is geïntroduceerd, wordt de naam sapo gebruikt, wat Spaans is voor 'pad'. De wetenschappelijke naam van de kikker was lange tijd Bufo marinus, wat 'pad van de zee' betekent. Later hebben biologen de soort een andere naam gegeven omdat de kikker minder ...

Reuzenpad - Wikipedia

5-MeO-DMT is a highly potent psychedelic molecule that occurs naturally in the venom of the Bufo alvarius toad. Although it's illegal pretty much everywhere (except in Mexico and, surprisingly, in Canada, where it's unregulated and online ordering is available) there exist no specialized drug tests able to detect it, so it can be said that ...

Home - BBC Reel

O alucinógeno, droga psicodélica, droga alucinógena ou droga alucinogénica é, literalmente, uma substância capaz de provocar alucinações. [1] A classificação mais consensualmente aceita para tal classe de substâncias psicoativas foi proposta por Jean Delay, que as classifica como dislépticas (modificadoras), em oposição aos analépticas (estimulantes) e lépticas (depressores).

Droga alucinógena - Wikipédia, a enciclopédia livre

6. LE CRAPAUD BUFO ALVARIUS. Le crapaud Bufo alvarius, aussi connu sous le nom de crapaud du désert de Sonora est un crapaud qui sécrète un poison comportant des propriétés psychoactives. Les glandes du crapaud excrètent le poison qui contient de la bufoténine et du 5-MeO-DMT qui peut être fumé.
