(PDF) Pathophysiology of Heart Disease.pdf | Risfandi ...

Heart failure results from injury to the myocardium from a variety of causes including ischemic heart disease, hypertension, and diabetes. Less common etiologies include cardiomyopathies, valvular disease, myocarditis, infections, systemic toxins, and cardiotoxic drugs.

The pathophysiology of heart failure - PubMed

That can lead to a decrease in the flow of blood to your heart muscle, keeping it from getting the oxygen it needs. The disease usually starts as a result of atherosclerosis, a condition sometimes...

Heart Disease: Types, Causes, and Symptoms

The coronary arteries supply blood, oxygen and nutrients to your heart. A buildup of plaque can narrow these arteries, decreasing blood flow to your heart. Eventually, the reduced blood flow may cause chest pain (angina), shortness of breath, or other coronary artery disease signs and symptoms. A complete blockage can cause a heart attack.

Coronary artery disease - Symptoms and causes - Mayo Clinic

Americans at Risk for Heart Disease As plaque builds up in the arteries of a person with heart disease, the inside of the arteries begins to narrow, which lessens or blocks the flow of blood. Plaque can also rupture (break open). When it does, a blood clot can form on the plaque, blocking the flow of blood.

Heart Disease Facts | cdc.gov

Heart failure signs and symptoms may include: Shortness of breath (dyspnea) when you exert yourself or when you lie down. Fatigue and weakness. Swelling (edema) in your legs, ankles and feet. Rapid or irregular heartbeat. Reduced ability to exercise. Persistent cough or wheezing with white or pink ...

Heart failure - Symptoms and causes - Mayo Clinic

Atrial fibrillation is an irregular and often rapid heart rate that can increase your risk of strokes, heart failure and other heart-related complications. During atrial fibrillation, the heart's two upper chambers (the atria) beat chaotically and irregularly — out of coordination with the two lower chambers (the ventricles) of the heart.

Atrial fibrillation - Symptoms and causes - Mayo Clinic

The pathophysiology of ischemic heart disease also involves the possible complications that can arise from the series of changes evolving from the disease. The most common complication is heart failure since the damaged tissues cannot pump blood effectively.

Pathophysiology of Ischemic Heart Disease Including Causes ...

Atherosclerosis refers to the buildup of fats, cholesterol and other substances in and on your artery walls (plaque), which can restrict blood flow. The plaque can burst, triggering a blood clot. Although atherosclerosis is often considered a heart problem, it can affect arteries anywhere in your body.

Arteriosclerosis / atherosclerosis - Symptoms and causes ...

Heart disease occurs when plaque develops in the arteries and blood vessels that lead to the heart. This blocks important nutrients and oxygen from reaching your heart. Plaque is a waxy substance...

Heart Disease Causes and Risk Factors - Healthline

The most common symptom of coronary artery disease is angina, or chest pain. Angina can be described as a discomfort, heaviness, pressure, aching, burning, fullness, squeezing, or painful feeling...

Heart Disease Symptoms & Signs of Other Heart Problems

Heart disease is caused by damage to all or part of the heart, damage to the coronary arteries, or a poor supply of nutrients and oxygen to the organ. Some types of heart disease, such as...
