Because a relatively small percentage of EMS calls involve a critically ill or injured child, it is common for the paramedic to experience anxiety when such a call is received. Pediatric Case Studies for the Paramedic contains 20 case studies representing a variety of pediatric emergencies that paramedics may encounter in the field.

The material for the Pediatric Simulation and Unfolding Case Study is included in the document found in File 1. Evaluation Description. Anecdotal reports noted by students indicate that they enjoyed the first version of the Pediatric Simulation and Unfolding Case Study. The material presented here is a thorough revision of that teaching strategy.

Pediatric Simulation and Unfolding Case Study

Pediatric Fever – Case Study. A 3-month-old child presents to the emergency room with her mother. The mother reports that the baby is not acting like herself and she is having a hard time arousing the baby. Upon inspection the baby is wrapped in blankets in her car seat sleeping. The nurse unwraps the baby and feels heat radiating off the child.
