A confidence interval for a population mean with a known standard deviation is based on the fact that the sampling distribution of the sample means follow an approximately normal distribution. Suppose that our sample has a mean of $= 10$, and we have constructed the 90% confidence interval (5, 15) where $EBM = 5$.

A Confidence Interval for a Population Standard Deviation ...

Cancer is the second most-frequent cause of death worldwide, killing more than 8 million people every year; the incidence of cancer is expected to increase by more than 50% over the coming decades ...

This post is a rapid literature review of pertinent paediatric literature regarding COVID-19 disease. We are proud to have joined forces with the UK Royal College of Paediatrics and Child Health to provide systematic search, and selected reviews of all the COVID-19 literature relevant to children and young people.

An evidence summary of Paediatric COVID-19 literature

CeO₂ is Fluorite structured and crystallizes in the cubic Fm-3m space group. The structure is three-dimensional. Ce⁴⁺ is bonded in a body-centered cubic geometry to eight equivalent O²⁻ atoms. All Ce-O bond lengths are 2.37 Å. O²⁻ is bonded to four equivalent Ce⁴⁺ atoms to form a mixture of edge and corner-sharing OCe₄ tetrahedra.

Xanthine oxidase (XO), which can catalyze the formation of xanthine or hypoxanthine to uric acid, is the most important target of gout. To explore the conformational changes for inhibitor binding, molecular dockings and molecular dynamics simulations were performed. Docking results indicated that three inhibitors had similar pose binding to XO. Molecular dynamics simulations showed that the ...
