process large amounts
of data continuously,
with a shorter
turnaround time. Real-
time data processing
involves continuous
input, processing and
output of data, with the
condition that the time
required for processing
is as short as possible.

short time period,
providing near-
instantaneous output.
The processing is done
as the data is inputted,
so it needs a
continuous stream of
input data in order to
provide a continuous
output.

Time Data teaches data engineers how to process unbounded streams of data in real-time using popular open-source frameworks. Outcome After the training participants will be able to independently implement real-time big data processing scenarios with the help of Apache Kafka and Apache Flink.
