And researchers studying those grains say that 4.4 billion years ago, Earth was a barren, mountainless place, and almost everything was under water. Only a handful of islands poked above the surface.

Early Earth Was Almost Entirely Underwater, With Just A ...

The most astonishing thing about the Denmark Strait cataract isn't, perhaps, how it got to be so tall and mighty, but that an undersea waterfall can

exist at all. It's easy to picture an ocean as a giant bathtub that sloshes around with the tides, but seawater is actually very dynamic; waters of different temperatures and salinities — and, therefore, densities — are always interacting on ...
